

How to prepare a research paper and present experimental data

Prof. Domenico CARPUTO

Dipartimento di Agraria (carputo@unina.it, phone 081-2539225)

September-November 2021
Class meets on a weekly basis

Course program

1. Introduction
2. The structure of a scientific paper
3. How to choose the appropriate Journal
4. How to write effective titles and abstracts
5. How to list the authors
6. Developing the outline
7. Components of a scientific paper (the IMRaD rule): an in-depth analysis
8. Effective preparation of tables and figures
9. Submitting the paper: Dealing with editors and reviewers
10. Fundamental rules for preparing oral presentations and posters
11. Use of English in oral and written works (Dr. Dianna Pickens, Centro Linguistico di Ateneo)

To earn credits, students must meet all the course requirements:

- regularly attend lectures
- complete the homework assignments
- pass a final exam (write a short research paper)
